"From the moment I met her, I fell in love with her spirit." Not just one person felt that spirit but all who were fortunate to know her. Carol Ann Gould was a woman of uncommon good cheer whose love of life influenced everyone and everything she did. Thousands of cards just to say, "I care" with her familiar happy face with glasses signature made the day brighter. Her glorious smile and infectious laugh put cares and tears aside, and we laughed with her. A selfless person who forever placed the needs of others first, she was the inspiration to family, friends and mere acquaintances to do the same. When she retired after 14 years of dedicated service as administrative assistant to Dr. Nancy Harris at Mass General Hospital she was the recipient of the coveted "chair". The diagnosis of MDS gave her opportunity to share with others how to confront the disease by LIVING. Sounds of the ocean and sand between her toes, flowers of spring, winter's snow all fed her love for nature and its beauty. And that beauty transcended to the incomparable love story of Carol Ann and her Bo. She leaves these words, "I will always be with you my dearest Bo." And from Bo, "You were the world to me, phenomenal friend, great partner. You are a person in the world, but to me you are my world and the love of my life."

The family extends special thanks for the loving care of so many: Dr. Nancy Harris, Dr. Yi-Bin Chen, Dr. Amir Fahti, Dr. Stephan McAfee, Dr. Thomas Spitzer and the staff of the Cox 1 Clinic and the Lunder 10 nursing and care staff of Massachusetts General Hospital.
